Dirk Javier

(+63) 9218458850
dirkjaviermvp@gmail.com
Batangas City, Philippines

Experience and Certifications

- **OneCFO |** Junior Developer Consultant **|** Eastwood, Quezon City **2025-2026**
    - Developed and enhanced an automated web scraping system, transforming a semi-automated process into a fully automated system—increasing processing capacity from **1,800 documents per week** to **800 per day**—while also handling data extraction, cleaning, and ETL for machine learning use.
    - Assisted in frontend and backend web development using Laravel, providing support as needed across various projects
    - Conducted manual unit testing, helping identify bugs early and improve overall system stability and reliability across company projects.
- **CCNA: Introduction to Networks,** *Cisco* ***2024***
- **Introduction to IoT,** *Cisco* ***2025***

Projects

PyCeal| ***Flask, HTML/CSS, SQLite, SQLAlchemy***

- Led and managed the development team of PyCeal, a secure ID generator using Flask and SQLite, integrating steganography to enhance data security.
- Created and optimized the steganography algorithm and decoder, designing them to securely encode sensitive information into images and efficiently decode it when required.
- Configured and developed all backend functionalities of the app using Flask, handling server-side logic and database integration, ensuring seamless integration and smooth operation of the application.

NetWoink | ***C#, WPF***

- Spearheaded the development of NetWoink, a Network Management System (NMS) built using C# and WPF, making key technical decisions and coordinating team efforts throughout the project.
- Implemented the core algorithms of the application by leveraging various networking protocols, including Address Resolution Protocol (ARP) and Simple Network Management Protocol (SNMP), creating the essential features of the application.
- Created and implemented the skeletal UI framework, establishing a structured and efficient base for further development by other team members.

BSU Marketplace| ***Flask, HTML/CSS, JavaScript, MySQL, SQLAlchemy***

- Oversaw the development of BSU Marketplace, an e-commerce web application for Batangas State University, managing the project from concept, including system design, to completion.
- Built the backend structure of the application, including the core CRUD functionalities, ensuring efficient data handling, scalability, and seamless integration with the frontend.
- Designed and normalized the database systems, eliminating redundancy and ensuring efficient data storage and retrieval.

Languages, Technologies and Skills

- **Languages**: Dart, Python, C#, C/C++, JavaScript, Java
- **Technologies:** Flutter, Flask, .NET Core, MERN, HTML/CSS, MySQL, SQLite, Firebase, MongoDB Git, WPF, Figma
- **Technical Skills:** Automation, Database Modelling (ERD, Normalization), Steganography, CRUD Operations, REST APIs, Googling
- **Soft Skills:** Team Leadership, Problem Solving, Communication, Collaboration, Time Management

Education

- **B.S. Computer Science,** Batangas State University – NEU, Philippines. ***2022-2026***
  Relevant Coursework: Software Engineering, Parallel Computing, Software Engineering, Data Structures
- **Science, Technology and Engineering (STEM)**, Naga City Science High School ***2022***
